**RE: eBioscience, Inc. Products**

To Whom It May Concern:

All Procarta and ProcartaPlex Immunoassay Products ("Products") manufactured by eBioscience, Inc. an Affymetrix Company, and shipped to Veritas (Affymetrix Distributor in Japan) do not contain living modified organisms, nor are they produced using a virus system. The antigen standards used for each of these assays are made up of recombinant proteins and these antigen proteins are manufactured using an e.coli recombinant protein expression system.

eBioscience recommends the use of gloves, lab coat, and eye protection when working with the or any chemical reagents. eBioscience assumes no liability for damage resulting from handling or contact with the products. Products are sold for research purposes only and are not intended for food, drug, household, agricultural, or cosmetic use.

Sincerely,

A handwritten signature in black ink, appearing to read "Theresa Schaub".
